PROFESSIONAL SUMMARY

AI graduate and AI Automation & Machine Learning Developer Intern with hands-on experience in LLM-based AI agents, Retrieval-Augmented Generation (RAG), prompt engineering, and deep learning. Experienced in building computer vision models, designing intelligent business agents, and turning research into practical AI product proposals.

EDUCATION

Khawaja Fareed University of Engineering and IT, Rahimyar Khan *March 2022 – Jan 2026*
Bachelor of Artificial Intelligence | GPA: 3.24

SKILLS SUMMARY

- **Languages:** Python, SQL, Java
- **AI & LLM:** LLM Applications, AI Agents, Prompt Engineering, RAG, Speech-to-Text (Whisper), Text-to-Speech
- **Automation & Data:** Workflow Automation, n8n, API Integrations, Apify (Web Scraping), Lead Generation
- **ML Frameworks:** TensorFlow, Keras, Scikit-Learn, Pandas, NumPy, Matplotlib
- **App Development:** React Native, Firebase
- **Tools & Platforms:** GitHub, VS Code, PyCharm, Jupyter Notebook, MySQL, SQLite, MS Office
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Analytical Thinking

WORK EXPERIENCE

AI Automation & Machine Learning Developer Intern *2026 – Present*
SMJ Solutions, Rahim Yar Khan | CMIT (Chief Minister IT) Internship Program, Punjab

- AI Engineer in a 4-member team building the **AI Employee Suite**: HR, Sales, Marketing and Support agents with a CEO Dashboard.
- Designing the HR and Support agents: LLM selection, prompt engineering, agent design and testing strategy.
- Architected the HR agent RAG knowledge base with role-based document access and human escalation for sensitive queries.
- Proposed AI products through R&D: predictive maintenance, procurement intelligence, ESG compliance and BI copilots.
- Performed QA testing of the company website and B2B lead generation using Apify-based web scraping.

AI & React Native Developer (Academic Experience) *Jan 2024 – Jan 2025*

- Built a cross-platform mobile application using React Native.
- Integrated Firebase for backend services, authentication, and database management.
- Collaborated on UI design, testing, and debugging for smooth application performance.
- Worked on improving user experience and application functionality.

PROJECTS

Voice + Gesture PC Agent (Team R&D Project) *2026 – Present*

- Multimodal AI agent that controls a PC through voice commands, hand gestures, and screen understanding.
- Own the Voice module: speech-to-text with faster-whisper and text-to-speech with Piper.
- Built the audio capture pipeline with native sample-rate detection and resampling to improve transcription accuracy.

AI-Based Skin Disease Detection System *Jan 2024 – Feb 2025*

- Developed an AI-powered skin disease detection system using deep learning and medical imaging datasets.
- Built and trained CNN models using TensorFlow/Keras, with image pre-processing and data augmentation.
- Integrated the AI model into a React Native mobile application with Firebase backend.

Plant Disease Classification System *Mar 2024 – Dec 2024*

- Developed a CNN-based plant disease classifier on the Plant Village dataset (50,000+ leaf images).
- Applied pre-processing and augmentation; evaluated using confusion matrix and performance metrics.

Movie Recommendation System *Mar 2023 – Dec 2023*

- Built a content-based recommendation system using similarity scoring on movie datasets.
- Delivered personalized movie recommendations based on user preferences.

CERTIFICATES

AI Prompting for Everyone – DeepLearning.AI *June 2026*
Practical prompt design for large language models in real-world applications.

Agent Skills with Anthropic – DeepLearning.AI *June 2026*
Building agentic AI systems with Claude: tool use, multi-step reasoning and agent workflows.
